

GIANT CONSTRUCTIONS

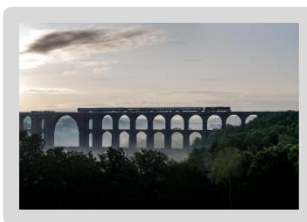

The World's Most Spectacular Bridges

Amongst the most epic structures to be found on this planet, they are the giants: The world's most spectacular bridges! These technical masterpieces have become more and more complex and impressive, meaning that those who design and build them are repeatedly trumping their contemporaries.

This documentary series presents an unusual view of the most breathtaking bridge structures ever built by man. It shows the sheer cruelty, and inhumane efforts which fuelled the construction and design of each of these individual giants. It casts a glance behind the scenes and shows how much effort is required on a daily basis to maintain these unique structures.

Thanks to its immense diversity, its stunning picture language and iconic CGI, this five-part series is an outstanding work. Each episode focuses on a different bridge type and presents several 'giants' in different parts of the world.

From the longest bridge in the world, to adventurous railway bridge constructions, to bridges built at dizzying heights, 'Giant Constructions' paints a comprehensive picture of the most spectacular bridges on the planet.

Episode structure:

Every episode begins with a spectacular introduction of highlights, celebrating the constructions gigantism with stunning helicopter shots and state of the art drone camera works.

When the documentary moves in closer, it focuses on the scientific aspects of each selected bridge. Iconic CGI and jaw dropping shots of maintenance workers in action will explain each bridges' neuralgic parts and answers the question, why each featured bridge is so different to all the other bridges on earth. Spectacular and never seen before archive footage and amazing historical photographs of the construction periods tell fascinating stories of catastrophes and heroes, that will always be connected to each of these overwhelming masterpieces of architecture.

The following types of bridges will be covered in the series:

- Episode 1: Railway Bridges
- Episode 2: Suspension Bridges
- Episode 3: Road Bridges
- Episode 4: Moving Bridges
- Episode 5: Steel bridges
