

Ultimate Vehicles

These are truly the ultimate vehicles ever built by man. The six episodes show the most incredible civil and military aircraft that have ever taken off into the skies. 'Ultimate Vehicles' further presents the most breath-taking tanks ever built. The documentary series shows the most spectacular ships and trains ever built and it shows us the ultimate vehicles on four wheels money can buy.

Each episode will feature six of the most extravagant vehicles in the world, discussing technical details and the history behind these extraordinary means of transportation.

Episode 1: Civil Aircraft

Humans have always dreamed of flying. Today, it has become part of our mass transportation system. Civil aviation today transports people breathtakingly fast in incredibly luxurious surroundings from A to B while also managing to transport unbelievable heavy loads. Ultimate Vehicles shows the fastest aircraft in the world, the most luxurious aircraft on the planet, the most famous aircraft ever, the largest machines, the most legendary aircraft and the most produced. We will take a look at commercial planes, showcasing the six ultimate and most magnificent flying machines.

Episode 2 – Military Aircraft:

They are legendary, deadly, and almost always belong to the top tier of aviation: military aircraft. No other sector invests as much money and nowhere are the requirements and challenges as high as in the military aviation sector. Higher, faster, further - is the credo in military aviation. Add invisibility and maximum weapons load to the list of superlatives. The best engineers, mechanics and construction experts have been working in this sector since the first military aircraft was ever built; this combination of talent and expertise continues to produce ultimate aircrafts.

Production house:

Ultimate Vehicles

This episode goes behind the scenes of military aircraft manufacturers, explains the biggest challenges and what maintenance measures are behind the superlative military aircraft. 'Ultimate Vehicles' shows the fastest, the most deadly, the invisible, the greatest, the most legendary and most produced military aircraft.

Episode 3: Ships

70% of the Earth's surface is covered by water. So, it makes sense that humans invented several means of transportation. Ships come in all shapes and sizes, some for military, some for commercial purposes, with some ships in existence the size of small cities. We are taking a look at six of the world's ultimate ships.

Episode 4: Tanks

In the age of drones, tanks remain an indispensable weapon throughout the war zones of the world and they come in several variations: with chain drive or on wheels, with turret or for troop transport. The advantages are obvious: the occupants are protected and can advance toward the enemy without needing cover. Because the military has always been a technical pioneer, today's tanks are high-tech powerhouses. We are taking a look at the world's most extreme tanks.

Episode 5: Megacars

There are normal cars and there are mega cars. The only thing the two have in common: four wheels. Any vehicle that classifies itself as a mega car definitely belongs among the most stunning vehicles ever seen. We talk, for example, about the largest, safest and most powerful vehicle that can be bought outside the military. We show the fastest car ever built by human hands. We take you for a ride on one of the most extreme off road vehicles ever experienced on this planet. We show you the fiercest military vehicle on four wheels, as well as an incredible military amphibian vehicle and the fastest truck in the world.

Episode 6: Trains

Trains seem to have lost importance in today's day and age. Individual means of transportation dominate daily life. Having said that, trains will always remain a part of the city-and landscape. Passenger trains or freight trains, there are countless trains to love. We take a look at the six ultimate train experiences.
